

BLAKE MASON

Business and Technology Specialist

HELLO

I love building applications and writing code! Web technologies are exciting and I enjoy using them and learning new ones. I have experience with JavaScript frameworks, and I strive to put my efforts toward ideas which can make the world a better place.

SKILLS

COVER LETTER

Dear Hiring Manager,

This letter is to express my interest in your posting on procore.com for the **Demo Engineer** position, and my confidence in my ability to be a productive contributor to your team. I believe that Procore works toward a valuable purpose in the construction management and tech industry, and it would be a privilege to add my efforts to the Procore team. I became a software engineer because I love code, and I believe my skills will succeed as a Demo Engineer.

Most recently I worked on three software projects while attending Hack Reactor: a front end capstone, a system design capstone, and a full stack final project. Each project required rigorous teamwork and collaboration while using real world, production grade practices and coding standards. Because I have prior experience working with JavaScript frameworks, I helped teach and guide each team I worked on. From forming an optimal toolchain, to managing git workflows, or simply providing words of encouragement, I was personally involved with each member while also providing my own technical contributions to the project.

I am confident my skills as a Demo Engineer will be valuable to Procore, and I would like to further discuss my qualifications. Please feel free to contact me by email at blakelmason@gmail.com or by phone at (714) 878-5117.

Sincerely,

Blake Mason
