

BLAKE MASON

Software Engineer

HELLO

I love building applications and writing code. Web technologies are exciting and I enjoy using them and learning new ones. I have experience with JavaScript frameworks, and I strive to put my efforts toward ideas which can make the world a better place.

SKILLS

COVER LETTER

Dear Hiring Manager,

This letter is to express my interest in your posting on indeed.com for the Web Developer position, and my confidence in my ability to be a productive contributor to your team. I believe that Purple works toward a valuable purpose, and it would be a privilege to work toward such a goal. I became a software engineer because I love code, and my skills will clearly succeed as a Web Developer for Purple.

Most recently I worked on three software projects while attending Hack Reactor: a front end capstone, a system design capstone, and a full stack final project. Each project required rigorous teamwork and collaboration while using real world, production grade practices and coding standards. Because I have prior experience working with JavaScript frameworks, I helped teach and guide each team I worked on. From forming an optimal toolchain, to managing git workflows, or simply providing words of encouragement, I was personally involved with each member while also providing my own technical contributions to the project.

My skills as a Web Developer will be valuable to Purple, and I would like to further discuss my qualifications. Please feel free to contact me by email at blakelmason@gmail.com or by phone at (714) 878-5117.

Sincerely,

Blake Mason
