BLAKE MASON

Software Engineer

HELLO

I love building applications and writing code! I find web technologies exciting and enjoy learning new ones. My experience is with JavaScript frameworks, and I strive to put my efforts toward ideas that can make the world a better place.

Puppeteer   Moment

Webpack   Docker

GraphQL   Cheerio

EXPERIENCE

Vonazon   2020
MARKETING AUTOMATION SPECIALIST
Full service digital sales and marketing agency

- Built websites for clients using the HubSpot CMS.

- Translated design and styling guidelines from the Graphics Design team to attractive, responsive web pages.

- Generated custom Bootstrap themes built from the Sass source files using node-sass.

- Created and updated custom templates and modules in HubSpot using the Hubl templating language and Preact, a performant React alternative.

US Wheel Corp.   2017 - 2019
SOFTWARE ENGINEER
Steel wheel assembly and tire distribution

- Wrote code to automate business operations such as order entry, invoicing, reporting, and generating work order bill of materials.

- Helped troubleshoot any IT problems for the office and warehouse.

EDUCATION

Hack Reactor   2020
SOFTWARE ENGINEERING IMMERSIVE
An advanced coding bootcamp focused on building autonomous software engineers ready for any job in the tech industry

- Worked on mastering full stack JavaScript and Computer Science fundamentals while exploring new tech using the most refined, up-to-date curriculum.

- Hosted a front end project on AWS EC2 free tier instances and designed a system to maximize application load.

- Split the proxy, services, and database to individual EC2 instances and configured a load balancer using NGINX.

UCI Division of Continuing Education   2018
WEB DEVELOPMENT BOOTCAMP
A web development program that teaches the key skills for full stack development

- Completed complex projects and received hands-on programming training through experiential learning opportunities.

Brigham Young University, Utah   2017
BACHELOR'S DEGREE - BUSINESS MANAGEMENT
